

Ventilation Controller

Model
VC-1

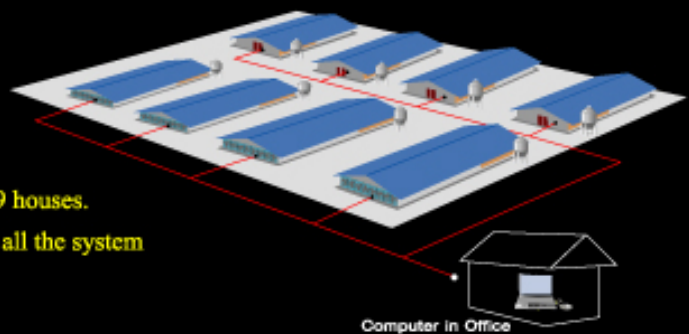

- 7 step for fan and 1 step for water pump are comfortable
- When the temperature low, the system can remove ammonia gases.
- Alarm contact on high, low temperature
- Can be use humidity data to control water pump and fan.
- Recordable highest - lowest temperature
- Preset temperature setting can be used 100 days and can be maintain the data when the electrical shut down.

- Controller and all sensor probe passed the standard measurement.
- Sensor probe can be read temperature 0-100°C, high accuracy 0.1°C.
- Sensor probe can be read RH 10-99%, high accuracy 1%RH.
- Sensor probe spread the standard signal 4-20mA in order to protect the signal loss.
- Show light signal on sensor probe when it communicate to controller.
- 4 temperature sensor (3 inside and 1 outside of the housing).
- 1RH sensor probe
- Can be take off each sensor probe for your crop finished using or cleaning house. (Our design used RCA quick jack.)

- Connect the VENTECH controller to your PC with VENTECH software
- Can be set all parameter to have accuracy data in max. 9 houses.
- Can be view graphs to show temperature, humidity and all the system under your control.
